

# Trello-like Project Management System

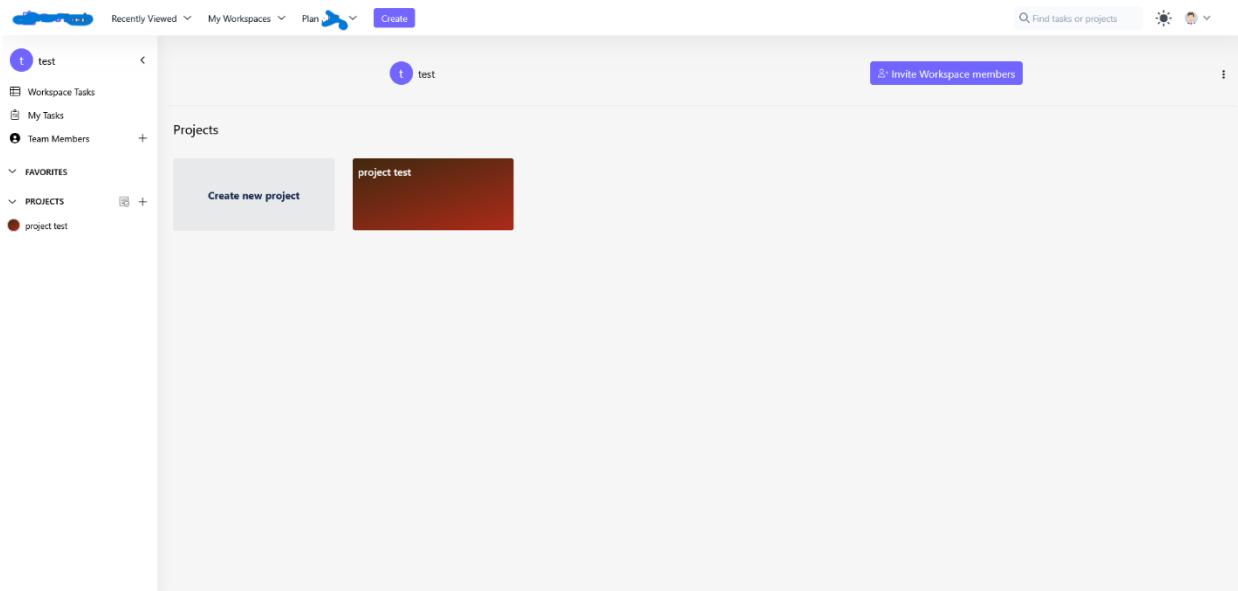

Laravel 10 + Vue 3 + Inertia.js | Full-Stack Development

Siamak Naghel — Full-Stack Developer

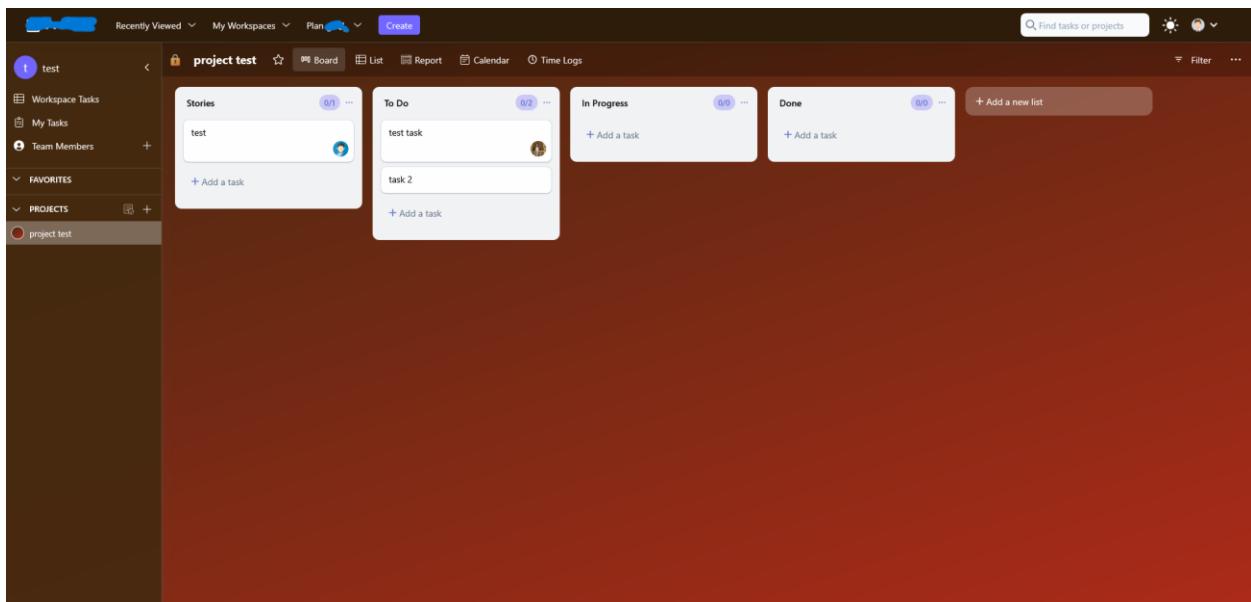

Built a modern task management tool for teams, inspired by Trello, with drag-and-drop workflows, real-time updates, and role-based access.

## 🔑 Key Features

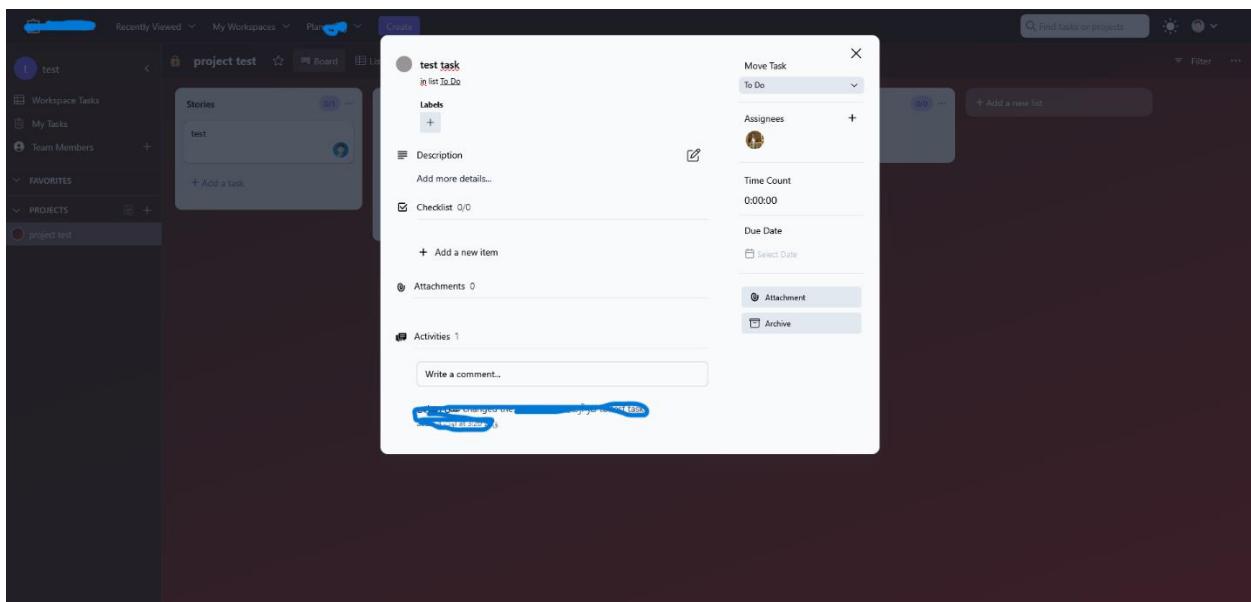

- Kanban Boards – Drag & drop tasks
- Task Assignment & Due Dates
- Team Collaboration (comments, mentions)
- Real-Time Updates (no refresh)
- Role-Based Access & Admin Panel
- Responsive UI (desktop & tablet)

"Project dashboard with team workspaces"

"Drag-and-drop Kanban board"

"Task details with activity log"

## Tech Stack

### ◊ Backend

- Laravel 10 (RESTful API Architecture)
- MySQL | Doctrine DBAL (Schema Management)
- Laravel Sanctum (API Authentication)

### ◊ Frontend

- Vue 3 + Composition API
- Inertia.js (Seamless Laravel-Vue Integration)
- Tailwind CSS (Utility-First Styling)

### ◊ Dev Tools

- Ziggy (Friendly Laravel Routes in JavaScript)
- Laravel Excel | Purify | DotEnv Editor
- PHPUnit & Factories (Testing & Seeding)

## Why It Matters

Helped streamline team workflows and replace manual tracking — improving productivity by ~35%.

 Code and demo available on request for confidentiality reasons.
